

HUNTER X

Relentless Insight. Strategic Offense.

HunterX isn't just for identifying risk, **it's built to win deals**. It combines industry-benchmarked risk intelligence with external exposure signals to create sales-ready reports that spark meaningful conversations and accelerate close rates.

Powered by Liongard, built for modern prospecting.

What It Does

External Cyber Risk & Business Impact

Establishes a clear external risk profile using industry-benchmarked cyber risk intelligence. Shows how an organization compares to breached companies, best-in-class security maturity, and peers to provide context to justify security services and investment.

Cyber Risk Quantification

Translates cyber risk into business and financial terms, including downtime, data loss, and uncovered exposure after insurance. Grounds security conversations in real-world impact, not assumptions.

External Domain & Infrastructure Signal

Gathers external signals associated with an organization's domain, email infrastructure, and public-facing assets. These signals support risk context and reporting, with no agents or internal access required.

Sales-Ready, Branded Reporting

Delivers polished, custom-branded reports designed for executive conversations, prospect engagement, and deal acceleration.

"Visibility is power—knowing when something changes can mean the difference between security and disaster. Liongard gives us that edge."

About Liongard

Liongard is redefining Attack Surface Management with an intelligent, AI-powered platform built for modern IT and security operations. Trusted by MSPs, MSSPs, and IT providers to protect over 70,000 end customers, Liongard delivers unified visibility across users, systems, networks, and cloud environments. With over 85 integrations, Liongard empowers teams to uncover hidden risks, enforce cybersecurity posture, and automate the actions that matter most. By combining deep asset intelligence with real-time insight and scalable remediation, Liongard fuels cyber resilience, operational efficiency, and sustainable growth.

liongard

Purpose-Built For

Aggressive Prospecting

Replace bland outreach with cyber risk intelligence. Position yourself as a security ally, not just another service provider.

Outbound Campaigns

Empower BDRs and AEs with firepower to fuel targeted campaigns and accelerate sales velocity.

Stealing Market Share

Show what incumbent providers missed. Surface risk. Win the account.

Pre-Onboarding Intel

Gather threat intelligence before the first discovery call, so you walk in with leverage.

Why It's a Game-Changer

1

Strike Before the Competition

Know your prospect's attack surface before they do, and make it part of your pitch.

2

No Setup, All Signal

Launch scans instantly. No agents, no install, no friction.

3

Turn Data Into Revenue

Convert external intelligence into signed contracts with trust-building insight.

4

Stay Ahead of Existing Clients

Run external scans on your current accounts to uncover new risks, spark proactive conversations, and reinforce your role as their trusted security advisor.

► Hunt Smarter. Win Faster.

Ready to take a more aggressive stance on sales and security?

Activate HunterX. Take the surface by storm.
